

# XBot User Manual

---

Version 1.0 – Powered by Xbot Tool

## 1. Introduction

XBot is a powerful automation tool for Twitter/X that allows you to automatically reply to posts and comments, as well as like specific tweets all based on your selected keywords. It is built with a professional program for easy setup, supports Telegram notifications, includes a test mode for safe trial runs, and requires no technical expertise to operate.

Whether you're managing multiple accounts, looking to promote specific topics, or simply want to automate interaction at scale, XBot offers a safe, flexible and configurable solution.

The screenshot displays two windows side-by-side. On the left is a web browser window for Twitter/X, showing a draft post from NASA (@NASA) dated Jul 17. The tweet encourages scientists, technologists, and storytellers to solve problems on Earth and in space. A reply is being typed: "Just wow . The universe is end!". Below the tweet are standard social media interaction metrics: 162 retweets, 655 likes, 3.5K quotes, and 154 replies. On the right is the XBot application window, which has a dark theme. It features a header with tabs for Home, Accounts, Keywords, Replies, and Config. Below the tabs are four buttons: Start Browser (green), Start (blue), Stop (red), and Toggle Test Mode (yellow). The main area of the XBot window is labeled "Log:" and contains several lines of log output in white text. The log includes messages about the MAC address, license validation, bot startup, and account loading. It also shows the command to start the bot and the message being posted in reply to NASA's tweet.

```
[INFO] MAC-adres: 58:a0:23:87:70:a2  
[✓] License is valid! The program will now start.  
[INFO] Starting bot...  
== Twitter/X Auto-Reply Bot Started (Like/Reply ratio 0.44) ==  
TEST MODE = False  
[INFO] MAC-adres: 58:a0:23:87:70:a2  
[✓] License is valid! The program will now start.  
Loaded 1 accounts, 2 keywords  
Browser connected, starting main routine.  
[REPLY-ACTIE] Would post: Just wow . The universe is endless for a reason. (try 1)
```

## 2. Installation

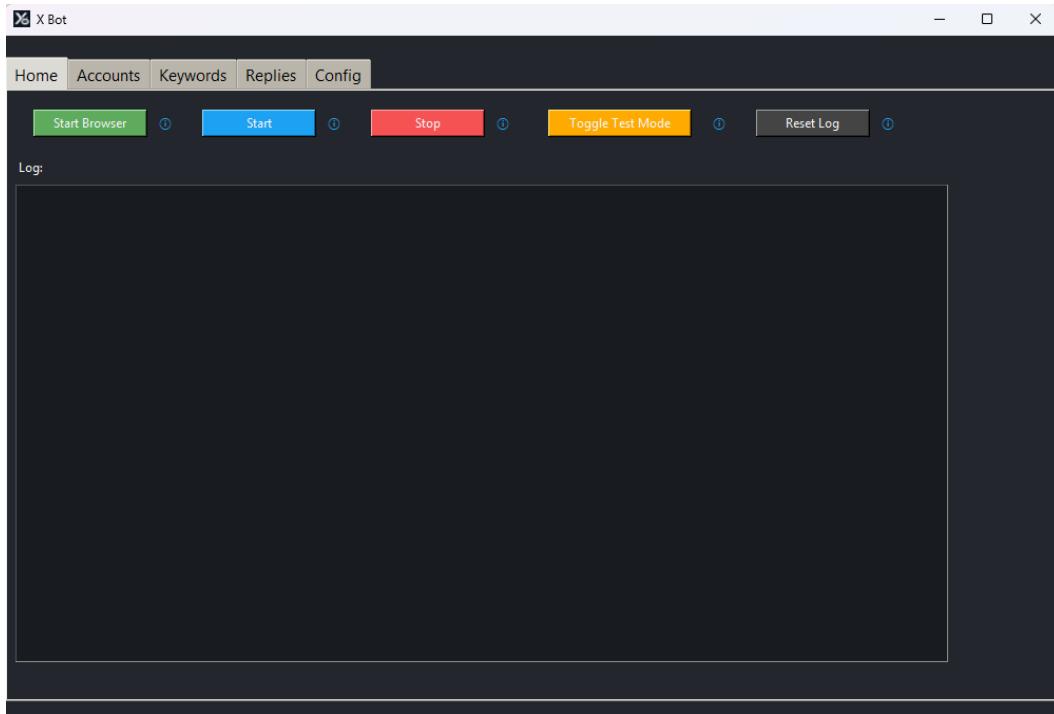

Step-by-step:

1. Download and extract the ` `.zip` file that contains the program.
2. Double-click `XBot.exe` to launch the program (no console window will appear).
3. Make sure you have \*\*Google Chrome\*\* installed XBot uses it in the background.
4. Once opened, go to the \*\*Home tab\*\* and press \*\*Start Browser\*\*.
5. A Chrome window will open in debug mode. \*\*Log in to your Twitter/X account manually via <https://x.com>\*\*.
6. Only when you are fully logged in and see your timeline, return to the program and press \*\*Start\*\*.  
**!** If you're planning to use Test Mode first, and then switch to live mode: always click \*\*Reset Log\*\* before switching. This ensures the bot starts fresh from your first account.

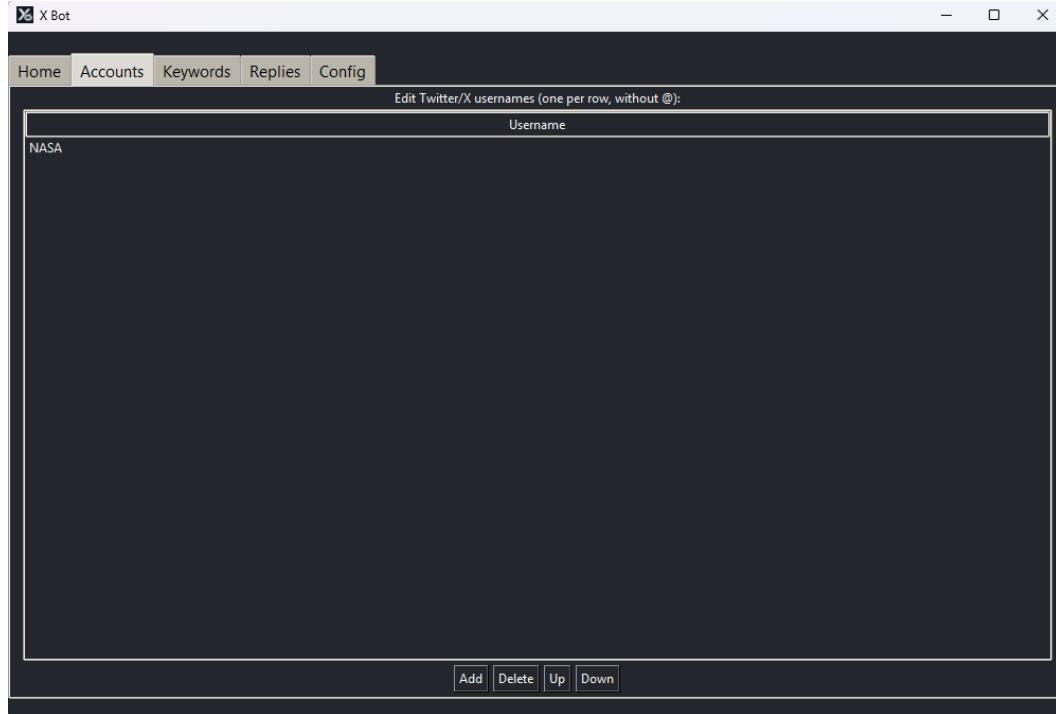

### 3. PROGRAM Overview

#### Home Tab

Example: Home Tab interface

- Start Browser: Always use this first. It opens a debug-enabled Chrome window the bot can control. You must log in to X manually in this window.
- Start: Begins bot activity. ⚠ Make sure:
  - You are logged in on X
  - You have filled in your accounts, keywords, and replies
  - You pressed Save Config if you changed anything
- Stop: Gracefully ends the session. Use before closing.
- Toggle Test Mode: When enabled, no likes or replies are posted. Use to simulate behavior.

Example: Accounts Tab interface

- Reset Log: Forces a full restart from the first account.

#### Accounts Tab

- Add the Twitter/X accounts **you want to scan and engage with**, one per row.
- **Do not** include the @ symbol.
- You can list multiple accounts — the bot will rotate through them.

X Bot

Home Accounts Keywords Replies Config

Edit replies (for each keyword/variant):

Keyword	Variant	Reply
space	1	Space never stops being fascinating.
space	2	Just wow . The universe is endless for a reason.
mars	1	Mars missions always feel like sci-fi come to life.
mars	2	Can't wait to see boots on Mars someday.

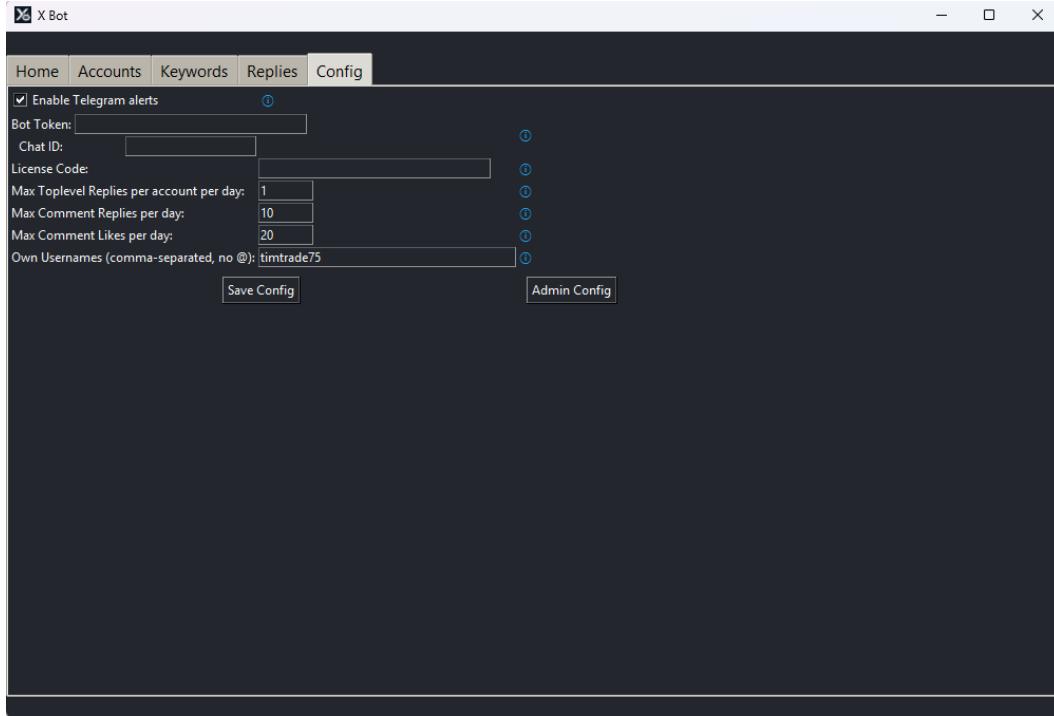

Add Delete Save

Example: Keywords Tab interface

- Example:
  - NASA
  - solana

### Keywords Tab

- Add words or phrases the bot should look for, one per row.
- Keywords **can contain spaces** (e.g., `copy trading`). Matching is done on substring basis.

Example: Replies Tab interface

- Examples:
  - Keyword: copy trading
    - Post: Best copy trading software today →  match
    - Post: copytrading is popular →  no match
- Matching is **not case-sensitive** here.

### Replies Tab

- Each reply row must match a keyword **exactly** (including case).

The screenshot shows the X Bot application window with the 'Config' tab selected. Inside, there's a modal dialog titled 'Advanced Config' containing numerous configuration options. Some of the visible parameters include:

Parameter	Value
telegram_notify_on_action	True
MAX_TOPLEVEL_ALL_ACCOUNTS_PER_DAY	2
MAX_TOTAL_REPLIES_PER_RUN	10
MIN_MINUTES_AFTER_POST	10
MAX_THREAD_AGE_DAYS	5
MAX_SCROLLS_COMMENTS	40
LIKE_REPLY_RATIO_MIN	0.3
REPLY_VARIANT_MEMORY_DAYS	1
ERROR_RETRY_LIMIT	2
ERROR_BACKOFF_THRESHOLD	4
ACTION_SLEEP_MIN_SECONDS	18
LOG_WRITE_INTERVAL	600
RESET_RESUME	False

At the bottom of the modal is a 'Save' button.

Example: Config Tab interface

- Columns:
  1. Keyword (must exactly match Keywords tab)
  2. Variant (number: 1, 2, ...)
  3. Reply text (this is what will be posted)
- Add multiple variants per keyword to randomize behavior.
- ! We recommend 3–5+ variants per keyword.
- ⚠ Do not use commas in replies — this breaks the CSV!

## Config Tab

- **Enable Telegram Alerts:** Tick to receive action alerts via Telegram.
- **Bot Token / Chat ID:** Needed to enable Telegram. See Section 5.
- **License Code:** Required to activate. Don't have one? Contact [@XbotTool](#)
- **Own Usernames:** Comma-separated list of usernames to skip (e.g., your own bots or team accounts).
- **Save Config:** ! Always press this after making any changes.
- **Admin Config:** Opens advanced configuration options. See Section 6.
- .

## 4. Activation & Licensing

Required

- A valid license code (from XBot support)
- Internet connection (license is MAC-bound)

Activation Process

- Enter your license code in the Config tab.
- Press Start.
- If valid, the bot unlocks and runs.
- Still need a license? Contact [@XbotTool](#) on Telegram.

## 5. Telegram Integration

Step-by-step setup:

### 1. Create a Bot

- Open Telegram and search @BotFather
- Type /newbot and follow the steps
- Copy the Bot Token

### 2. Get Chat ID

- Open a chat with @userinfobot
- Type /start
- Copy your numeric chat\_id

### 3. Configure

- Paste both fields in the program under Config
- Tick "Enable Telegram Alerts"
- Press Save Config

## 6. Advanced Config (Admin)

### Configuration Settings

Setting	Description
LIKE_REPLY_RATIO_MIN / MAX	Randomly varies between min and max. E.g. 0.4–0.7 = 40–70% replies. Rest are likes.
MAX_ACTIONS_PER_POST	Max replies or likes per tweet. Prevents over-engagement.
MIN_MINUTES_AFTER_POST	Wait time before a post is eligible for engagement (prevents instant replies).
MAX_POST_AGE_DAYS	Ignores comments older than X days.
MAX_THREAD_AGE_DAYS	Ignores tweets older than X days.
LOG_WRITE_INTERVAL	How often logs are saved to disk. Default: every 600 sec.
RESET_RESUME	Set <code>True</code> to force fresh start (from first account).

## 7. Output & Logging

results\_<timestamp>.csv

- Contains timestamp, account, tweet ID, comment ID, keyword, reply, and result
- Use this to analyze what was posted or liked

 debug.log

- Only used if something fails. Can be shared for support.

 reply\_log.json & universal\_action\_log.json

- Internal memory of what's already processed
- ! Never edit manually. You may corrupt the bot's tracking logic.

## 8. FAQ

**Q: I pressed Start but nothing happens.**

- Did you click **Start Browser** first?
- Are you logged in to Twitter?
- Did you fill in accounts, keywords, replies?
- Did you save the config?

**Q: I want to test first without real replies.**

- Toggle **Test Mode** and run normally. No posts will be made.

**Q: Bot is replying to my own tweets!**

- Add your usernames in the Config tab under “Own Usernames” (comma-separated)

**Q: I want to switch from Test to Live mode.**

- Click **Reset Log** first. Then toggle off Test Mode and press Start.

**Q: Telegram doesn't notify me.**

- Double-check your bot token and chat ID. Save config. Restart bot.

**Q: Reply variants not working?**

- Your reply keyword must match the Keywords tab **exactly and case-sensitive**.
- Add multiple variants like 1, 2, 3 for each keyword.

**Q: Can I edit the CSV manually?**

- Yes, but be careful: no commas in replies. Use plain text.
-
